

DOOR & FURNITURE HARDWARE

CATALOGUE 2025

SAFEX AT A GLANCE

Since 1997, SAFEX has been a trusted name in the field of **Architectural and Glass Hardware**, known for delivering products that combine exceptional quality, design, and reliability. With a wide range of offerings including **Furniture Handles and Knobs, Door Handles, 3D Adjustable Concealed Hinges, Glass Fittings, Door Hardware, Aluminium profiles, SS Inlay profiles**, and more—Safex caters to modern architecture with a blend of strength, durability, and aesthetic excellence.

Our commitment to **quality and innovation** has positioned us as a preferred choice among:

- Renowned **Architects**
- Leading **Builders & Contractors**
- **Fabricators & Interior Designers**
- **Corporate Houses and Government Projects**

We constantly update our product lines to meet the evolving needs of the industry. As part of our expansion, **Safex has recently introduced:**

- **Slim Profile Sliding Systems**
- **Shutter Profiles**
- **Wardrobe Profiles**

These new additions reflect our focus on creating **streamlined, modern solutions** that are functional, stylish, and compatible with contemporary architectural requirements.

With a strong legacy, a growing customer base, and a passionate team, **Safex continues to invest in technology, people, and processes** to maintain its leadership in the hardware industry.

Our Vision

To be the most trusted and innovative provider of architectural hardware solutions in India and beyond.

Our Mission

To deliver superior quality products that inspire confidence, enhance functionality, and elevate design.

Safex offers complete architectural hardware solutions for both Glass and Wooden applications—making us a one-stop destination for all your hardware needs.

INDEX

Telescopic Sliding (Wooden Door)

Safex telescopic sliding is the elegant, space saving roller guided sliding system for extensive and spacious passages. This happens almost silently thanks to precision ball bearings and the toothed belt connection.

Telescopic Sliding Doors are space saving technology, suitable where there is less back run space / less door parking space to open the door.

Ideal for very large/extra large opening. Partial opening can also be easily achieved

Perfectly noiseless and smooth sliding arrangement

Suitable for 2-leaf systems of up to 80 kg per leaf, per leaf width between at least 475 mm to 1200 mm.

**IMPORTED**

Safex Telescopic Sliding System is a top hung synchronized sliding system for telescopic glass door panels up to 80 kg each.

This is an economical sliding solution for 8 to 10 mm thick glass. Clamps make it easy to install.

Advantages and Benefits

- with one single movement you can open all doors simultaneously in the same direction.
- Synchronized opening system of 2+1fix and 3+1fix doors
- Clean opening, No floor tracks.
- Ideal for partitioning the interior of Rooms, Office, Meeting halls, Board Room etc
- Two sets can be installed, one at each end of the opening, to cover a maximum distance of 5.6 m (18.4)
- Uses Compression clamps: no need to Hole in the glass.
- Quick and easy installation and adjustment.
- Both side soft close mechanism

Application

Residential, commercial and institutional room division.

Wardrobe Sliding Fittings

Wardrobe Sliding Fittings are hardware components used to install sliding doors in wardrobes and closets. Instead of using hinged doors that swing open, sliding systems allow the doors to move horizontally along a track, saving space and adding a sleek, modern look.

Load Capacity: Up to 50 kg per door

FEATURES:

- **Smooth & Silent Operation**
High-quality ball bearing rollers ensure effortless and quiet door movement.
- **Durable Construction**
Heavy-duty steel and anodized aluminium components for long-lasting performance.
- **Top & Bottom Running System**
Ensures perfect alignment and load distribution reducing door sagging.
- **Modern Aesthetic**
Sleek track design blends with all types of wardrobe finishes.

Wooden Sliding Fitting

SF-WSL-50

Components Included:

- 4x Top Rollers (2 per door)
- 4x Bottom Rollers (2 per door)
- Door stoppers
- Screws and accessories for installation
- Floor guides for alignment

ADVANTAGES OF DOOR SEALS

No Sound

No Water

No Insect

No Light

No Smoke

No Dust

ADVANTAGES OF DOOR SEALS

For the easy functioning of the doors and windows, there should be gaps between the edges of the frame and the sill, but these gaps can allow the invasion of dust, insects, noise, water, and air drafts.

UNDERSTANDING THE PROBLEM

To quote an instance, the heat loss from an unsealed home through gaps around doors and windows is around 12%.

SOLUTION TO THE PROBLEM

By using Selex sealing system which seals these gaps and works against intrusion and leakage. Works on all doors and windows without hindering the normal routine and use. And can be easily installed.

DROP DOWN SEALS

HOTEL LOCK SYSTEM

Adopting encrypted, stable intelligent card as its key, it incorporates high microcomputer technology, electro-mechanical technology, advanced mechanical processing techniques and perfect surface finish techniques as an integral whole, and takes various users' requirements into consideration, it can completely adapt the complexity of different situations, and it is of significant meaning to strengthen the management and improve the safety of hotels.

LOCK FEATURES

- Lock latches meet international standard, safety and reliability.
- Special grade micro motor for reliable operation with low power consumption.
- Inner real time clock; guest card will terminate automatically at checkout time; the staff card can be set for limited duration according to the shifts which can be more than one.
- Lock can be opened by various types of cards and mechanical key in case of dead batteries or any other emergency.
- The lock can record the latest 200 entries (including unlocking by mechanical key, Card or door not properly closed etc.) in order to check and print.
- Through Authorization card, the settings of the whole lock system can be modified quickly and easily without the need of opening the lock to reset thus effectively enhancing the safety of hotel door locks.
- The lock can be operated for about 200 times even after the low battery indication.
- Lock can be dead-bolted from inside eliminating the need of door chain.
- Lock gives visual and acoustic response to every input signal for easy operation & troubleshooting.
- Guest card replacement function: Guest card issued later makes the previous one invalid automatically, which simplifies the operation process.
- Various management cards include - time correction card, installation card, check out card, backup card, lost reporting card, cancel lost reporting card, etc.
- Various door opening cards include - guest card, general card, emergency card, building-use card, floor-use card, office card, etc.

FEATURES

- Cards uses Mifare technology manufactured by PHILIPS which is superior to magnetic & RFID Cards.
- Card Works at 13.56 MHz which enables it to carry more information with more security.
- Data Cards can extract upto last 80 entries from the lock almost eliminating the need of expensive data collecting devices.
- Time of keeping data: More than 100 entries

- Environmental temperature: Between -40° to 85° C
- One Mifare S50 card is equivalent to 16 RFID cards. Therefore in a hotel, the user can achieve access control, elevator control, AJ-TAS and consumption management with one all-purpose card.
- The Card is a multipurpose card and can be used for a total of 16 different applications at any single time, such as opening door locks, storing consumption in a restaurant and many other Hotel activities

Hotel-Lock Management Software

SAFEX LOCK MANAGEMENT SYSTEM is simple to use, fast, stable and suitable for different grades hotels. This system is developed on the basis of the management experience of a lot of hotels worldwide. The main functions are :check in, check out, change room, extend stay, issue/disable various kinds of function cards, staff management, permission management, report management: issue card records, unlock records, check in records, maintenance records, handset management and so on. This software is highly reliable for use with hotel locks and it supports the USB reader.

System Requirements

- 32 or 64 bit version of Windows 8/7 / VISTA/ XP operating system
- Optical Disk Drive
- One spare USB port
- Display Resolution of 800x600 or higher
